Embedding SWU Library Research Guides into your Canvas course

SWU librarians design research guides that help students work through research assignments and connect them to a subject special librarian in the discipline. Below are instructions for embedding a guide into your courses in Canvas.

**Step 1**
Step 2
Log into your Canvas course [http://swu.instructure.com](http://swu.instructure.com) or [http://my.swu.edu](http://my.swu.edu).
Step 3
View one of your courses, then click on Modules.

If you do not have the modules on your navigation bar, you can add it to your page setting. To create a module click on “Add new module” on the right side of the page, add your title and click “Add Module”.

![Image of mySWU interface showing Modules selection and Create Module form]
Step 4
Click “Add content” to your module.

Step 5
Scroll down to “External URL”, enter the URL, name the page “LibGuides” (or research guides, or whatever you want to call it) and click “Add Item”.

Now the research guide is embedded in your course where students can see and interact with it.
